The Examiner states that restriction is required under 35 U.S.C. § 121 to one of the following inventions:

Group I:      Claims 1-29, drawn to a sensor apparatus  
Classified in class 73, subclass 753; or

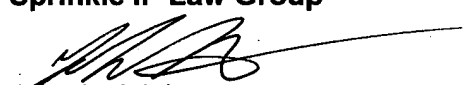

Group II:      Claims 30-54, drawn to a method for digitally controlling a sensor system  
Classified in class 257, subclass 80.

Applicant elects to prosecute Claims 30-54 of Group II with traverse. The traversal is based on an examination of all the claims not being a burden upon the Office.
